- Modified report formats

## New features and changes for version 2.8.0.0

- Speed improvements for application start
- Improved data import handling
- User Interface (UI) cleanup
- Expanded reporting capabilities
- Minor bug fixes

New users - Getting Started

Following installation, you can run MTrax by double-clicking on the MTrax icon. Unregistered copies will display the **MTrax Trial** screen. Click **OK** to continue and the **Welcome** screen is displayed.

Windows Vista, 7 and 8 users: Please see the support bulletin below for special instructions for setting compatibility.
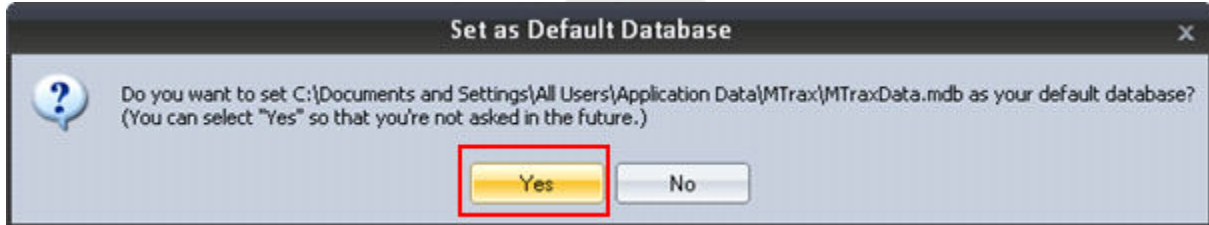

To set up MTrax, click on **File** and then **Open MTrax Database**.
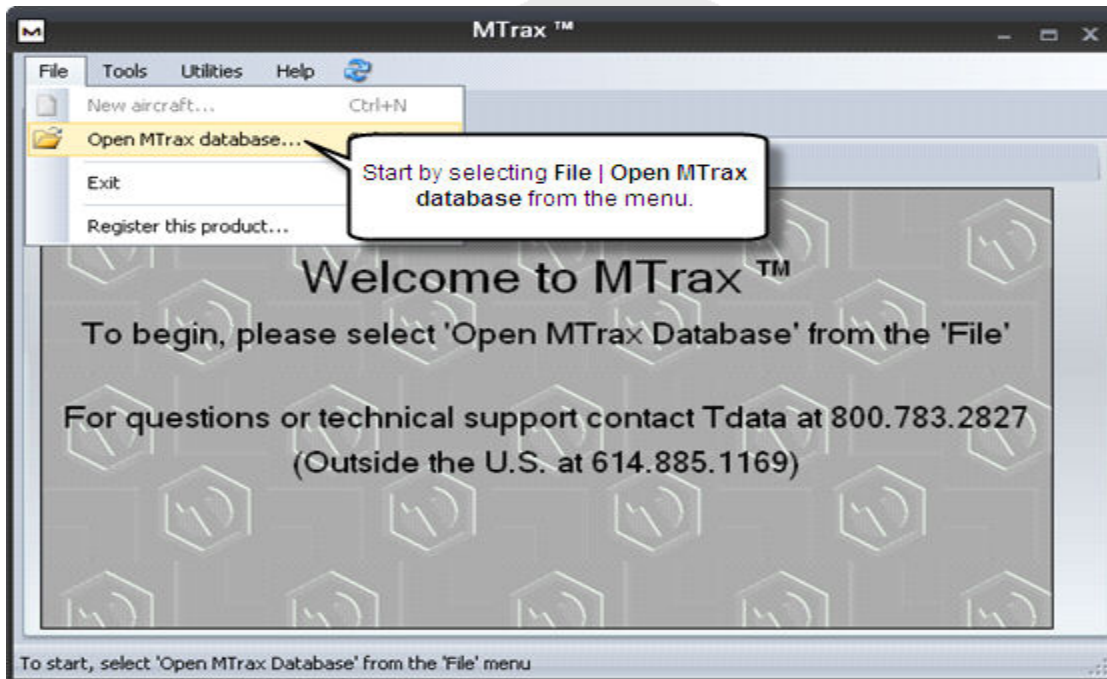

Select **MTraxData**.**mdb** from the list and then click **Open**.
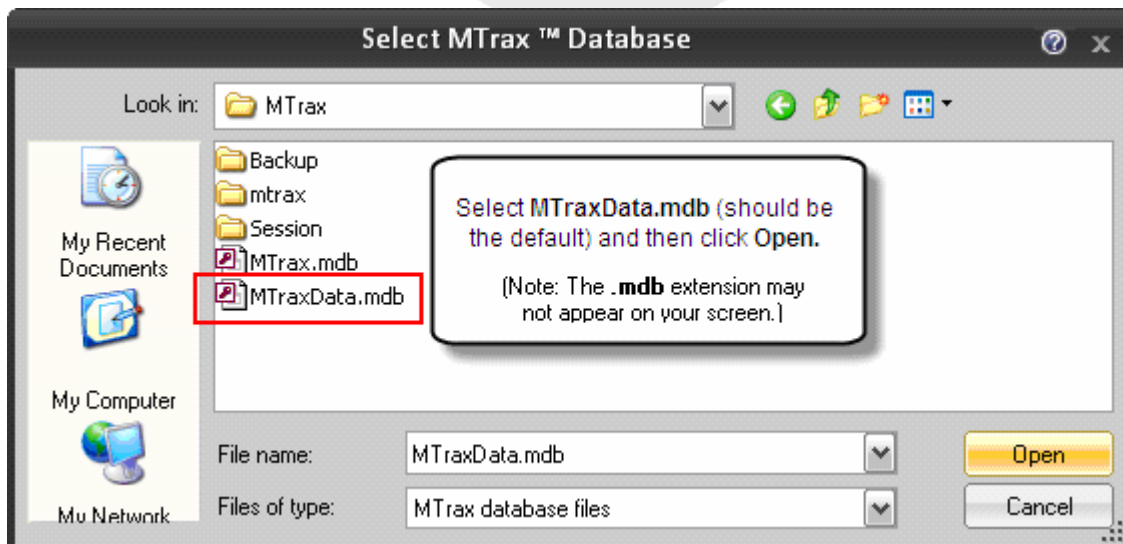

You will be prompted to set it as the default database, please select **Yes**.

Importing Files from version 1.5x

When MTrax is first run, there will be no aircraft in the database. You can create new aircraft by selecting **File | New Aircraft** or import your existing files used by MTrax *version 1.5x*.

To import aircraft files, select **Tools | Import MTrax Files**. The **Import Wizard** is displayed.
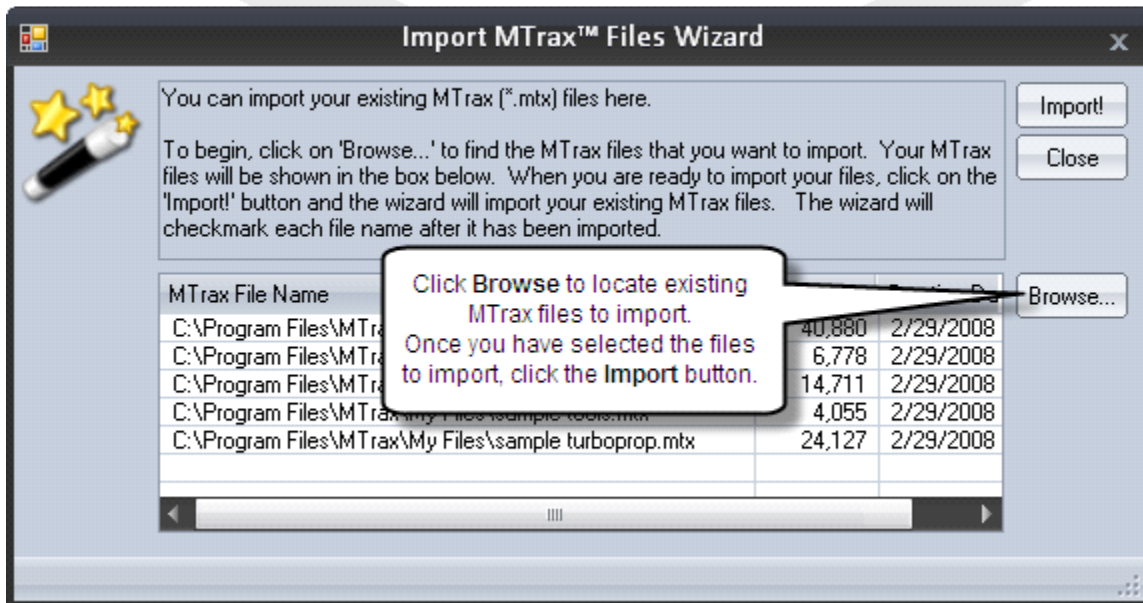

Click on **Browse** to locate and select the MTrax files that you wish to import and then click **Open**.
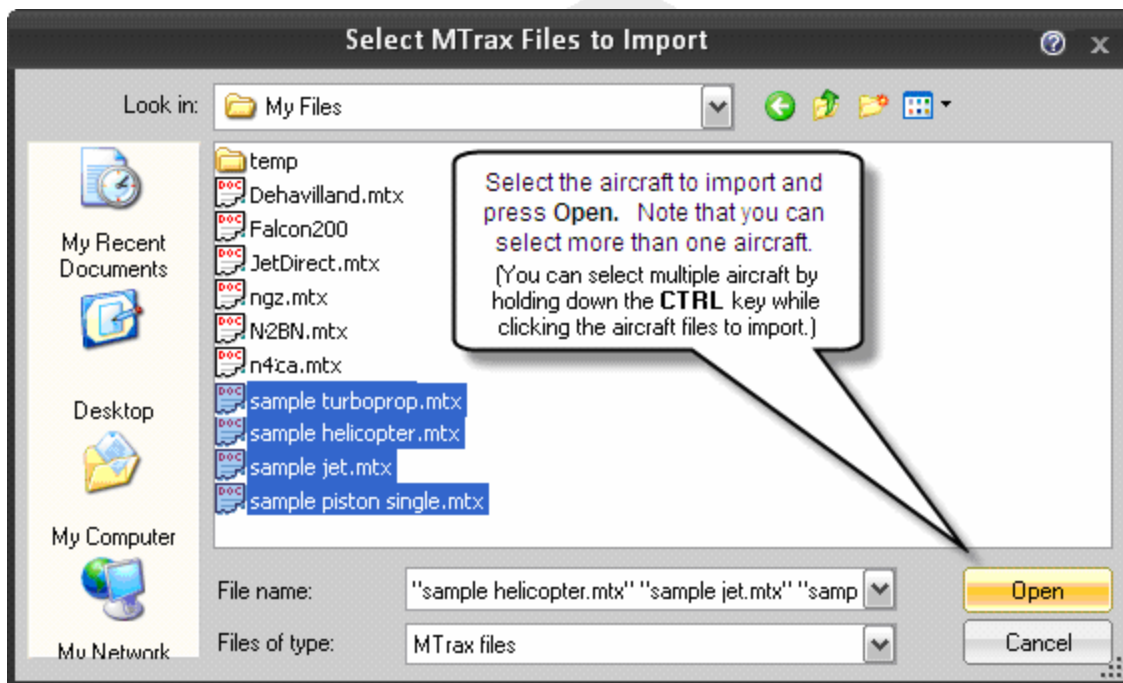

Next, click on **Import!** in the **Import Wizard** window and your existing MTrax files are imported into MTrax and will appear on the main MTrax screen.

MTrax™ Support Bulletin

If you experience problems running MTrax software, please follow the steps below to ensure that MTrax runs properly.

Summary:

Windows operating system upgrades offers security enhancements which may affect a variety of software designed to run under Windows XP. Some of these enhancements include user permissions to file saving, folder and registry operations.

Problems you may experience:

- Error message: "You don't appear to have the correct permissions. Please run this application as Administrator."
- Error message: "Error when renaming <filename> to <filename>. Access to the path is denied."
- Other miscellaneous messages regarding file saving, renaming and the like.

Solution:

1. Right-click on the MTrax icon on your desktop.
2. Click on **Properties**
3. Click on **Compatibility** tab
4. Click the **Run this program as an Administrator** checkbox

5. Click the **Apply** button
6. Click the **OK** Button

The actions listed above register MTrax as a trusted program with Windows operating system and you will now be able to run MTrax without problems.

If you need assistance with this procedure or are still experiencing problems, please call us at 800-783-2827 or 614-885-1169. You can also obtain support via email support@tdata.com
